

CAREER OBJECTIVES – M.E. CSE

Product Based IT Companies | Services Based IT Companies | Academia (Professor) and Coaching | Researchers and Scientist | Analyst and Banking Software Engineers

Product Based IT Companies

Indian IT industry is growing exponentially and many companies like Google, Microsoft, Amazon, Xerox, IBM research, Paypal, Flipkart, Ebay, Snapdeal have huge no of openings in their india offices. Large no of startups are now coming up. There are just hundreds of awesome companies to apply and work for.

Services Based IT Companies

Indian IT traditionally has been focused on providing services development, maintenance, support for Web based, Mobile applications, ERP systems. There are many many opportunities as entry level engineers. This ofcourse is the last option for many engineers from premier engg. colleges because of Low quality work and Low paychecks.

Academia (Professor) and Coaching

With the rise in no of engineering colleges, this has led to rise in coaching academies. The Quality of Teachers in india is very low and there is great opportunity for people who enjoy teaching. A Masters degree certainly makes you eligible for you to grab this.

Researchers and Scientist

A lot of product based companies (Google, MSR, IBM research, Xerox, Infosys Labs, Samsung R&D) and Government agencies (DRDO, ISRO, BARC, BEL) hire masters student with specialization in different fields. You can work and build your profile in Cloud Computing, Big Data, AI, Machine Learning, Data Science, Language and Speech etc.

There are absolutely unprecedented no of opportunities in this space. Many companies even promote you to do a fully funded doctoral as a part of their research.

Analyst and Banking Software Engineers

Many Investment banking firms, Many Stock analysis firms are ready to pay huge paychecks for Quant Analyst profiles. You can work towards and specialise in Trading Algorithms.
